Shareholders' equity	39,691,000	35,433,000

To Our Shareholders and Employees

Sales and operating revenues for the 1975 fiscal year were \$106,737,000, which was a 25% increase over the prior year's \$85,348,000. Net earnings were \$4,434,000, which was \$3.16 per share compared with \$2,808,000, or \$2.00 per share for fiscal 1974. The return per dollar of sales was 4.2ϕ and the return on shareholders' equity was 11.8%, which compares with 3.3ϕ and 8.2% respectively for the prior year.

In August of 1974, Del Monte Corporation, which owns substantially all of the outstanding 936,000 Class B common shares (two-thirds of the total equity capital), made an offer to purchase for \$12.00 per share all of the outstanding 468,000 Class A common shares (one-third of the total equity capital), which were held by 2,400 shareholders. Del Monte Corporation has been successful in acquiring 97.5% of the outstanding Class A common shares, and now owns 98.4% of the total equity capital of the Company.

The return on shareholders' equity for the fiscal year of 11.8% achieved the Company's objective of a return in excess of 10%. This is an important achievement, but the high level of inflation has eroded the expectation of an improved working capital position from this increased return on equity. A significant increase in inventory value, due to higher costs and a higher quantity of carryover inventory, has required working capital which is considerably in excess of the working capital increase which resulted from the higher level of earnings.

A change in accounting policy with respect to inventory valuation was established for fiscal 1975. The method of valuation was changed to an average-cost method from the first-in, first-out (FIFO) method previously used. It is believed that the average-cost method provides a cost structure for cost of goods sold which more properly matches costs with revenue than does the FIFO method. This change had the effect of reducing net earnings after taxes by approximately \$950,000.

Manufacturing costs during the past year increased to a greater ex-

tent than had ever previously been experienced. Prices paid to growers for fruits and vegetables were up significantly over previous years. Other major components, such as labour, energy, tin plate, packaging, sugar, and most other supplies were at record high levels. As a result of these higher costs, selling prices on all product lines were increased substantially during the year.

The market for canned foods suffered a slowdown during the early months of calendar year 1975, as wholesalers reduced inventories and consumers changed their buying habits. This left us with a higher level of inventory at the year end than had been anticipated, but our packs for the 1975 packing season have been adjusted to bring our inventory levels in line with the quantities required to meet our market expectations.

Capital expenditures of \$2,858,000 for fiscal 1975 were up considerably compared with the past few years. Expansion of warehouse facilities and acquisition of some efficiency improvement equipment were undertaken during the year, in addition to the normal equipment replacement program. Due to increased costs these programs required substantially greater funds.

The development of new products is a continuing program, requiring much in the way of research to find products which fulfil a need and which are acceptable to the consuming public. In January 1975 we launched a line of carbohydrate-reduced single serving puddings under the AYLMER Diet De Luxe label. This product has received excellent acceptance from consumers.

For the most part we experienced good crops during the 1975 packing season, and there should be sufficient inventories of most canned fruit and vegetable items to meet our requirements. Cool weather with excessive moisture created some problems in Southwestern Ontario with respect to the tomato harvest, and the packs of whole tomatoes, in particular, were adversely affected.

While the price of sugar has

dropped significantly, and the raw produce prices for fruit held steady with those of 1974, the industry is experiencing higher costs this year for processing vegetables, labour, tin plate, packaging, and energy. The net result is that the total costs again are higher this year than last year, and it is expected that selling prices will advance on a number of products.

Effective January 1, 1975, the Company increased the pension of former employees who retired prior to January 1, 1974. This change was in response to a concern for retired employees with respect to the impact of the higher cost of living on their income from the Company retirement plan.

Mr. J. Y. Massey, Vice-President-Marketing, resigned from the Company at the end of December 1974, having served very capably in that capacity since 1971. Mr. G. B. Culbert was appointed Director of Marketing to succeed Mr. Massey.

Mr. Charles S. MacNaughton, Chairman of the Board of Fry Mills Spence Limited, and Mr. Fred H. McNeil, Deputy Chairman and Chief Executive Officer of the Bank of Montreal, were elected to the Board of Directors at the Annual Meeting on October 3, 1974.

Messrs. L. M. Crandall, W. I. Drynan, and L. A. Philip will not be standing for re-election to the Board of Directors at the Annual Meeting on October 2, 1975. They have each served the Company as members of the Board of Directors in excess of twenty-five years. Mr. Drynan joined the Company in 1923 and was President from 1952 to 1965. The Board wishes to express appreciation for the long and devoted contribution that each has given to the Company.

The success of our Company is largely dependent upon the efforts of our employees, and it is with gratitude that we express appreciation for a job well done.

On behalf of the Board of Directors,
Ross B. Yerby,
Chairman
L. H. Johnston,
President

Hamilton, Ontario, September 8, 1975

Notes to Consolidated Financial Statements

MAY 31, 1975

1. Summary of Accounting Policies:

The significant accounting practices and policies employed in the preparation of the consolidated financial statements of Canadian Canners Limited and its subsidiaries are summarized below.

a.) Consolidation

The consolidated financial statements, include the accounts of the Company and its subsidiary companies all of which are wholly-owned:

Aylmer Foods Warehousing Limited Boese Foods Limited Canners Machinery Limited Duncan Lithographing Company (Limited) The Pyramid Canners Limited St. Williams Preservers Limited Wagstaffe Limited Walmer Transport Company Limited

b.) Inventories -

Inventories are stated at the lower of cost and net realizable value, primarily using the average method to determine cost.

c.) Costs allocable to future operations -

Prepayment of insurance, rents, taxes and other expenses clearly related to future periods are considered costs allocable to future operations and are not charged against current earnings. In addition, the Company defers freight costs associated with the movement of finished cased goods from the packing locations to distribution warehouses and certain expenditures on growing crops that directly relate to future years' packing seasons.

d.) Fixed assets -

Fixed assets are stated at cost.

Depreciation is provided at rates designed to amortize the cost of the assets over their estimated useful lives as follows:

Buildings — $2\frac{1}{2}$ % annually on a straight-line basis

Machinery and equipment — 6% annually on a straight-line basis

Automotive equipment — 30% annually on a declining balance basis

The cost of fixed assets retired or otherwise disposed of, and accumulated depreciation thereon, are removed from the accounts and any resulting gain or loss is included in earnings for the year.

Expenditures for maintenance and repairs are charged to earnings when they are incurred, and renewals and betterments are capitalized.

e.) Goodwill -

Goodwill which arose prior to April 1, 1974 has not been amortized and will be retained as an asset indefinitely unless a reduction in its value becomes evident. Goodwill arising subsequent to this date, if any, will be amortized to income over its estimated life, not exceeding forty years.

f.) Deferred income taxes -

Deferred income taxes result principally from the difference between depreciation methods used for financial reporting purposes and depreciation methods allowable in determining taxable income.

g.) Other significant policies -

Research and development cost, development of new products, advertising and sales promotion expenses are charged against income as incurred.

2. Change in Accounting Policy:

During the year the Company changed its method of valuing merchandise and materials and supplies inventories from the first-in, first-out (FIFO) method to the average cost method. The change has the effect of reducing the net earnings of the Company for the year by approximately \$950,000.

3. Inventories:

At May 31, inventories comprise:

	1975	1974
Merchandise Materials and supplies	\$28,951,000	\$15,986,000
	16,066,000	13,303,000
	\$45,017,000	\$29,289,000

4. Arrears in Dividends:

Class A Common Shares -

The holders of Class A common shares are entitled to cumulative cash dividends at the rate of 75¢ per share per annum in priority to any dividends on the Class B common shares. To June 30, 1975, the dividends in arrears which have accumulated in varying amounts annually since September 30, 1968, aggregate \$995,000.

Class B Common Shares -

Subject to the prior rights of the Class A common shares, the holders of Class B common shares are entitled to cash dividends accumulating from the date of issue on October 1, 1956 at the rate of 75% per share per annum. To June 30, 1975, the dividends in arrears which have accumulated since October 1, 1956, aggregate \$13,166,000.

After the Class A and B common shares have received payment of all accumulated dividends, Class A and B common shares share equally in any dividends in excess of 75¢ per share per annum.

5. Depreciation:

Depreciation provided during the 1975 fiscal year aggregates \$1,899,000 (\$1,373,000 in 1974). Included in the provision for the current year is an additional amortization of \$381,000 relating to certain buildings which by agreements finalized in the 1975 fiscal year must be destroyed during the 1977 fiscal year.

6. Pension Plans:

During the year the pension plans for hourly and salaried employees were amended in order to provide for an increase in pension benefits to former employees who retired before January 1, 1974. The Company paid and charged to operations \$435,000 which fully funded this increase in benefits. This amount was in excess of the annual normal pension contribution of the Company for the year.

At May 31, 1975, there was no past service pension liability relating to the Company's pension plans.

7. Long-term Leases:

At May 31, 1975, the Company had long-term leases expiring in various years through 1994 covering land, buildings and equipment. The average annual rentals payable under these agreements are estimated at \$583,000 for the year ended May 31, 1976, \$451,000 for 1977-81 and \$155,000 for 1982-94.

8. Remuneration of Directors and Officers:

During the year ended May 31, 1975, the aggregate direct remuneration paid by the Company to twelve directors as directors was \$10,800 (\$7,000 in 1974) and to eight officers as officers (5 of whom were directors) was \$195,000 (\$175,000 in 1974).

Auditors' Report

To the Shareholders of Canadian Canners Limited:

We have examined the consolidated balance sheet of Canadian Canners Limited and its subsidiary companies as at May 31, 1975 and the consolidated statements of earnings and retained earnings and changes in financial position for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these consolidated financial statements present fairly the financial position of the companies as at May 31, 1975 and the results of their operations and the changes in their financial position for the year then ended in accordance with generally accepted accounting principles which, except for the change, with which we concur, in accounting for inventories referred to in Note 2 to the financial statements, have been applied on a basis consistent with that of the preceding year.

Price Waterhouse & Co., Chartered Accountants.
